Mr.R.C. Spalding, M.A., F.R.I.C., acts as County Analyst for the District

SEVENOAKS RURAL DISTRICT

Telephone No. Tonbridge 3329

3, River Walk, Tonbridge

To the Chairman and Members of the Sevenoaks Rural District Council Mr. Chairman, Ladies and Gentlemen,

I have the honour to present the Annual Report on the health of the District for 1971.

The estimated mid-year population of the District, given by the Registrar-General, was 45, 560, a decrease of 180 over the 1970 figure.

The total number of registered live births was 593 (319 males and 274 females), this figure being a little lower than last year's total of 598. The crude birth rate was 13.0 per 1,000 population, the corrected birth rate being 13.9, compared with 16.0 for England and Wales.

The number of deaths from all causes totalled 482 (221 males and 261 females), this figure being higher than last year's total of 446. The crude death rate per 1,000 population was 10.6, the corrected death rate for the District being 10.5, compared with 11.6 for England and Wales.

Deaths of infants under one year numbered 10, giving an Infant Mortality Rate of 17.0. The rate for England and Wales was 18.0 The Neo-Natal Death Rate (the number of deaths of infants under four weeks) was 15.0.

There were 34 deaths from Cancer of the Lung and Bronchus (25 males and 9 females), compared with 26 the previous year.

The number of notifiable infectious diseases recorded in the District was 205, compared with 135 in 1970.

On page 16 of this Report, figures are given showing the number of persons immunised and vaccinated during the year under review.

It will be appreciated that this report is an attempt to record the quality of life in our own small community, this in turn reflecting the work of our medical and social services against an environmental background in the planning and improving of which so much time is voluntarily spent by our Civic representatives. This is supplemented by a vast volume of voluntary effort by individuals both inside and outside these services, and to these I should like to record my indebtedness for their help on so many occasions during the year.

However, consideration of the facts of life and death in this report will, I hope, remind us that our personal habits and choice in our mode of life would be as important in improving the health of our community and reduction of the pollution of our environment, as would thought and kindness in caring for our neighbours.

Once again my sincere thanks are due to Mr. Terry and the staff of the Department, and to all those too numerous to mention, who have so patiently assisted in the compilation of these statistics.

I am, Ladies and Gentlemen,

Your obedient Servant,

R.G. BRENNEN

Medical Officer of Health

REGISTRATION OF NURSING HOMES

(Sections 187 to 194 of the Public Health Act, 1936 as amended by the Nursing Homes Act, 1963)

	Number	Number of beds provided for:					
	Homes	Maternity	Others	Total			
Homes registered during year	-	-	=	GRO .			
Homes whose registrations were withdrawn during year	-	-	_	-			
Homes on register at end of year	1	conta	13	13			

Visits of inspection, and special visits as required, are made to the above Nursing Home during the year.

NATIONAL ASSISTANCE ACT, 1948 - SECTION 47 NATIONAL ASSISTANCE (AMENDMENT) ACT, 1951

(Removal to suitable premises of persons in need of care and attention)

No action was necessary under these Enactments during the year.

Laboratory Service

The Public Health Laboratory Service, under the Directorship of Dr.A.L. Furniss, provided excellent facilities during the year for the examination of specimens, and full co-operation with the staff was maintained. Valuable facilities are also available in the Pathological Departments of the following hospitals: Kent and Sussex, Pembury, Sevenoaks and Orpington.

Staff Medical Examinations

During the year eleven medical examinations were carried out for the District for superannuation purposes, and two for Heavy Goods Vehicle Licences.

International Vaccination Certificates

These are authenticated on request, in accordance with International agreements. In co-operation with the immigration authorities, persons arriving in this country from infected or suspected areas without valid certificates are kept under surveillance by the Health Department.

LOCAL HEALTH SERVICES OF THE KENT COUNTY COUNCIL

HEALTH SERVICES

Ambulance Facilities

Enquiries relating to ambulance service matters and requests for ambulance transport are dealt with by the Kent County Council Ambulance Service from their station at Moor Road, Sevenoaks (Tel. Sevenoaks 51088)

Domiciliary Midwifery

The County Council arranges for the free attendance of midwives upon patients who are to be confined at home. The name and address of the appropriate midwife for any particular district is usually known to the patient's doctor, but can be obtained from the Area Office of the County Council.

Home Nursing Service

The County Council provides a service free of charge for the attendance on persons whose doctors require them to be nursed in their own homes. The nurse's attendance in normally arranged by the doctor, but the name and address of the appropriate nurse for any particular district is obtainable from the Area Office of the County Council.

SOCIAL SERVICES

Area Office

Area Director:-

Mr.G.H.Foster, 152, London Road, Sevenoaks. Tel. Sevenoaks 52833

Home Help Service

Home help service may be provided in households where it is needed owing to the presence of a person who is ill, lying-in, an expectant mother, aged, handicapped as a result of having suffered from illness or congenital deformity, or a child not over compulsory school age, but only where there is no able-bodied person in the household capable of carrying out the necessary household duties.

Night and Evening Service

Evening service is provided for elderly people who are bedridden or house-bound and have no one to assist them to prepare for the night and includes the provision of a light meal or hot drink and attention to fires. Night service is provided, for no longer than three weeks unless there are exceptional circumstances, for the care of seriously ill people who are living in their own homes and who need attention during the night. In some cases the service is provided for one to three nights a week to give relief to relatives.

Family Care Service

This service is provided for the short-term care of children in their own homes during the absence of the mother by reason of admission to hospital for illness or confinement or in other special circumstances. Help is given only to families where care of at least two children is involved and the period of service is limited to three months.

Family Welfare Service

This service is provided, with the parent's consent, in households where the habits, behaviour and standards of living of the family are much below those generally accepted in the society in which they live. The three main objectives of the service are to raise the standard of living of the families, to improve the welfare of the children, and to keep the families together and prevent their break-up. Intensive training for a period of three months is given and this is succeeded by a follow-on service of nine months. In families where there is medical evidence of mental subnormality the continuance of the service after the initial period of three months may be approved for not more than twelve hours a week until the youngest child reaches compulsory school age.

SEVENOAKS RURAL DISTRICT SANITARY CIRCUMSTANCES OF THE DISTRICT

1. Water Supply

The district is supplied by six authorities as follows:- Metropolitan, East Surrey, Mid Kent, Mid Sussex, Sevenoaks and Tonbridge Water Companies and Tunbridge Wells Borough Council, all main waters being of a hard nature.

Complaints of shortage of supply have been received from an area in the south west corner of the district and this was being investigated at the end of the year.

The fluoride content is approximately 0.1 ppm.

All main supplies are sampled regularly and in addition samples are submitted from private supplies in the area.

Examination reports on water samples taken during the year were as follows:-

	Bacteriological Examination			Chemical Examination			
	No. of Samples	Satis- factory	Not Satis- factory	No. of Samples	*	Not Satis- factory	
Statutory supply undertakings	41	40	1	-	_	a	
Private sources piped to dwellings	113	66	47	4	2	2	
Other private sources	Caso	GWO	-	1	-	1	

A very large proportion of the district is fed by main water and, at the year's end, progress was at last being made to supply Dunsdale, French Street and Horns Hill areas, Westerham, with main water. Schemes are also under consideration for Moat Lane, Cowden and Coopers Lane, Fordcombe. Should all these areas be connected to main, the number of houses on private supplies would be reduced by 47.

Private supplies to houses in the district are as follows:-

Borehole supply 91 (1 of these is supplied via a standpipe)

Well supply 12 Spring supply 106 Rain water supply 22 Sixteen houses, (8 of which are unoccupied) are supplied by standpipes off the main and a formal notice was served in respect of 5 of these during the year, requiring water to be piped inside the dwelling. One of the houses is subject to closing order procedure, but remains occupied.

Nineteen houses previously supplied by rain water, springs and well were connected to the main supply, and a chlorination plant was installed in an estate spring supply serving nineteen properties and which was found to be polluted.

The following mains extensions were carried out during the year:-

The Sevenoaks and Tonbridge Water Company

During the year 56l yards of mains extensions were carried out within the Company's Statutory Area. In addition, 3,310 yards of trunk and pumping mains were laid by the Company.

The Mid Kent Water Company

A total of 982 yards of 4 inch mains were laid during the year in Shoreham. The Company now supply water to 1,333 properties in Kemsing and 46 properties in part of Shoreham.

The East Surrey Water Company

No major extensions have been carried out during the year.

The Bough Beech source which has been mentioned previously went into supply permanently in April 1971 and now supplies part of the area.

The Metropolitan Water Board

No new sources of supply were instituted and there were no changes to the general scheme of supply in the area.

All new and repaired mains are disinfected with chlorine: after a predetermined period of contact the pipes are flushed out and refilled; samples of water are then collected from these treated mains; and the mains are returned to service only after the analytical results are found to be satisfactory.

The quality control from the Board's laboratories is carried out by means of daily sampling from sources of supply, from the treatment works or well stations, from the distribution system, and through to the consumer. Any sign of contamination or any other abnormality is immediately investigated.

2. Drainage and Sewerage

As a result of the Badgers Mount/Shoreham Lane, Halstead sewer extension scheme, 17 premises were connected to the sewer and the cesspools previously in use abolished. Two houses in Knockholt were connected to the existing sewer and the cesspools were demolished. One replacement septic tank and two cesspools were constructed under the supervision of the department.

Seven bucket closets were replaced by water closets.

 $Mr_{\circ}R_{\circ}J_{\circ}$ Hills, the Engineer & Surveyor, has kindly supplied the undermentioned information:=

Sewage Treatment Works

The tertiary treatment lagoon system at Edenbridge Sewage Works, referred to in the report for 1970, was fully commissioned during the summer. The analyses of the final effluents show a great improvement particularly with regard to biochemical oxygen demand and suspended solids. The single experimental lagoon is retained for use in emergencies only.

Sewerage

During the year, 710 lin. yds. of defective foul sewers were reconstructed, 2,589 lin.yds. new foul sewers provided, and 22 properties connected to main sewerage for the first time.

General requirements and adequacy of existing facilities

Whilst the major population centres are adequately served by the main foul sewerage systems, proposals to serve outlying areas by sewer estensions, based upon a three year rolling programme, have been formulated. Schemes proposed for 1972/73 are as follows:

- 1. Ide Hill, Sundridge
- 2. Burlings Lane, Knockholt
- 3. Pilgrims Way and Beechy Lees, Otford
- 4. Chart Lane, Brasted

In addition to the above it is proposed to lay a relief foul sewer in Edenbridge to provide additional capacity particularly in storm time.

3. Refuse Collection and Disposal

Cleansing Services

The benefits of Work Study became noticeable during the year but, due to days lost from sickness, absenteeism and holidays, it was not possible over some periods to maintain the refuse collection service and reduce the cesspool backlog of work. The bulky collection service had to be withdrawn throughout the summer holiday months due to staff shortage.

Edenbridge tip, which is nearing the end of its life, had to be closed in November due to a fire at Ide Hill tip which destroyed the sheds, tractor and tools. This severely restricted the paper and cardboard salvage operations.

No new refuse vehicles were purchashed during the year but one new 1500 gallon cesspool emptying machine, replacing one of 800 gallons, has assisted in increasing output.

Two Cintafuse incinerators were installed at the G.L.C. Spitals Cross Estate blocks of flats late in the year, to deal with the refuse which descends the chutes. Prior to this installation, considerable difficulty was experienced with storage and removal of the large bulk of refuse involved. No problems have been met with the installation which now produces three bins of ashes instead of the equivalent of 50 or more dustbins. No smoke nuisance has been reported from the incinerators.

4. Swimming Pools

Number of public swimming pools	0 0 0	0 0 0	0 0 0	000		Nil
Number of school swimming pools	0 • •	0 0 0	0 0 0	000		23

Number of samples taken:						
	Satisfa	actory	000	0 0 0	000	43
	Unsatis	sfacto	ry .		000	7

All school pools except one are chlorinated by automatic treatment plants. The odd one is treated by hand. The poor samples were obtained where increased doses had not been introduced during warm periods when the pools were subjected to heavier loads. In addition to taking samples, the Inspectors give advice on foot hygiene etc., and check the condition of the pool at shallow and deep ends with a comparator advising on adjusting the chlorine dosage according to load. The schools also possess these testing appliances and are advised on their frequent use.

350 faeces specimens were submitted to the Public Health Laboratory for examination in connection with an outbreak of Sonne Dysentery.

A sizeable cold store exists in the district which deals not only with wholesale sale of meat but also includes an inland port to which container traffic is directed under the Imported Food Regulations from 13 British ports. A total of 242 container notifications were received, and consignments arrive at all hours at Dunton Green. The food involved includes beef quarters and many forms of frozen vegetables, together with lamb, chilled and frozen beef cuts, and tinned fruit.

Shrimps from Japan are held at the cold store pending the result of sampling at London Docks.

Four food factories at Dunton Green and one at Otford produce frozen meat portions and cuts, vegetable packs, mixed pizza and beef extract for export.

A large number of inspections are necessary at the establishments involved to ensure hygienic standards are maintained, and to inspect a small proportion of the container traffic.

3

A large number of visits were carried out to a farm in connection with the operation of a dried poultry manure plant which was installed in 1970. Considerable nuisance was caused by smell and smuts, and after failure of informal action the Council authorised the service of formal notices. At the time the farmer was developing a low pressure machine where recycling was operated by augers, and the farmer gave an undertaking to utilise the first machine only when wind and weather permitted. This he did and formal action was unnecessary. At the end of the year the new plant was still not operating fully and it is not known whether the low pressure machine will eliminate nuisance. The dried poultry manure is fed to chicken in the battery units as well as to calves and beasts.

A leak developed in a fuel oil pipe line serving a private housing estate, and the oil found its way into the drainage system causing temporary damage to the local village sewage plant. Fortunately the filters recovered quickly and very little oil found its way into the stream flowing alongside the estate.

Considerable nuisance occurred in part of the southern area due to effluent from a tannery, when excess acid from the neutralising plant reacted with sulphides in the sludge giving off foul gases through the unintercepted drainage systems of houses in the locality. A prohibition notice was served and it is anticipated that suitable plant will be installed at the tannery to prevent this nuisance in 1972.

Many visits were made to industrial tips in the area seeking to enforce the requirements of the Planning Authority as well as to control the nuisance caused by a subterranean fire at one tip. Little clay was available to seal off the fire and pressure was brought to bear on the operators to improve the position. Only dry waste is tipped, none of which is toxic, though small amounts of asbestos waste are deposited and supervision has been necessary to ensure compliance with the Code of Practice issued by the Asbestos Research Council.

Proceedings were necessary in connection with one grocers shop where 100 lbs. of unsound food were seized in addition to large quantities which were surrendered voluntarily. A fine of £25 was imposed, together with costs of £3. The proprietor sold the business and the new occupiers, after repairing the premises, practice a very high standard of food hygiene.

No other proceedings were taken in connection with food complaints but warning letters were sent in respect of the following:

Foreign objects in milk	3
Sausages - mouldy	1
Bread - mouldy	1
Bacon = strong smell	1
Meat pies - mouldy	2

Three day rallies were held in the year, two at Penshurst Place (attendance 9-10,000) and one at Hever (6,000). No nuisance was caused, the organisers being in each case responsible for refuse and sewage disposal.

Gypsy Encampment, Hever Road, Edenbridge

Difficulties continued at this site during the year but every effort is made by regular visits to improve the standards.

Planning permission has been granted by the Kent County Council for the continued use of the site as an encampment until the 31st December, 1978.

6. Hop Pickers' Camps

Number of camps in the District	• • •	0 0 0		1
Number of huts occupied in the District	000	0 0 0	• • •	2
Total estimated number of persons engaged in hop-picking (excluding home pickers)				_
(excluding nome pickers)	0 • •		• • •	2
Number of inspections of hop fields and camps during 1971	000		• • •	3

The increased use of mechanical means for the picking of hops has reduced the number of camps over the years with a corresponding reduction in the number of imported pickers, and most of the work is done by local labour.

One farm re-used two huts during the season for a very short period. No cases of infectious disease occurred, and conditions were satisfactory.

7. Disinfestation

Infestations were dealt with as follows:-

Flies 4: Fleas 7: 21: Ants Beetles 6: Wasps 263: 35 8 Bats 1: Silver Fish Bees Cockroaches Slugs 2: 1: Bugs 1: Insects 3: Crickets

8. Prevention of Damage by Pests Acts, 1949

Total number of caravans permitted on licensed sit	es 268	10
Number of caravans on unlicensed sites	Not kno	own

Many visits continue to be made to unauthorised sites around the district. On Common land, some success was obtained temporarily by ditching to keep the gypsies away, but elsewhere considerable fouling has taken place and, when the occupants had moved on, large accumulations of material had to be removed by the Cleansing Staff.

INSPECTION AND SUPERVISION OF FOOD

Ice Cream	136	136	136	136
Food Stalls & Vehicles	14	14	14	14

A detailed re-survey of the food shops etc., in the district commenced during the year and it is hoped this will be completed in 1972, resulting in general improvements in the standard of the premises as well as improving hygienic practices and control of coded foods in the shops.

A survey of public houses is made each year and a report submitted to the Sevenoaks and Tonbridge Licensing Justices for consideration at their annual meetings. With the increased volume of catering carried out in such premises, improvements are being called for in kitchen facilities.

Fourteen mobile shops/canteens operate from within the district, carrying on the trades of catering, grocery, greengrocery, and fish. Many other vehicles operate from outside the district, mainly selling ice cream, grocery, greengrocery and fish. A satisfactory standard is maintained.

FOOD AND DRUGS ACT, 1955

Details of the samples taken by the County Sampling Officers within the Sevenoaks Rural District during the year ended 31st December, 1971.

	Satis- factory	Unsatis- factory

UNSATISFACTORY SAMPLES

Pasteurised Milk

Small amount of extraneous water. Follow-up sample satisfactory.

Channel Island Pasteurised Milk (4 samples)

Bottles contained film of denatured milk and mould hyphae. Dairy cautioned.

Tinned Stewed Steak with Gravy

Below required meat content. Follow-up sample satisfactory.

Essence of Linseed (2 samples)

Below required strength of Ether and Chloroform. Old stock. No further action.

Dispepsia Tablets

Below required strength of chloroform. Follow-up sample satisfactory. Fresh Cream (4 samples)

Methylene Blue tests unsatisfactory. Enquiries continuing.

7. Poultry Inspection

Number of poultry processing premises within the District	000	• • •	1
Number of visits to these premises	0 0 0	000	268
Total number of birds processed during the year		• • •	2,523,130
Type of birds processed	0 • 0		Broilers
Percentage of birds rejected as unfit for human consumption			2.4
Weight of poultry condemned as unfit for human consumption	000	• • •	60 tons 5 cwts qrs.
			14 lbs.

A slight increase occurred in throughput but the amount condemned was 27 tons above last year. This was due in the main to a Fowl Pest outbreak in January/February when one day alone, 3,5000 birds were condemned. Other condemnations were due to chronic respiratory disease (C.R.D) and E.Coli infection (approximately 60%), physical damage, malformation and emaciation. Leucosis and Marek's disease are tending to decrease. In all 60,551 birds were rejected.

Daily visits are made to the plant when the birds which have been discarded by the spotters are examined by the Public Health Inspectors, and the work of the spotters checked for efficiency by observations on the eviscerating line. The group who operate the plant employ their own bacteriologist and swabs are taken from the spin chiller by the Public Health Department for presence of salmonellae. All swabs proved negative in the year.

In addition to improvements to hygiene in the evisceration trough, a new Stork Boxmeer stunning trough and grading rack have been provided. The final washer (80 ppm) and spin chiller (50 ppm) are superchlorinated, and at the year's end consideration was being given to installing an ice making plant to provide ice for the spin chiller, and chlorination either throughout the plant or at specified points on the production line.

I would compliment the operators on the standards achieved in an old building and on their continual comperation.

Egg packing has now ceased and the buildings previously involved are now utilised for cutting and packing of chicken portions.

8. Unsound Food

Food condemned during the year as unfit for human consumption:

	Tons.	Cwts.	Qrs.	lbs.	ozs.
Meat	10	16	-	21	4
Fish	ass	2	1	24	8
Tinned Foods	9	9	1	19	3 1
Other Food	-	12	3	7	134

Condemned meat is dyed and removed by contractors under supervision for conversion to fertilisers etc. Other unsound foods are disposed of at the Council's tips.

Many consignments of food were examined and sizeable quantities condemned in the following cases:-

1558 lbs. Argentine Beef in Cyvac packs - decomposed.

1419 lbs.Argentine Beef in Cyvac packs - decomposed.

1457 lbs. Irish Beef in Swissvac packs - decomposed.

173 x 10 lbs. cans Apricot Pulp - blown, rusted and damaged.

9. Food Poisoning

Five cases of food poisoning were notified during the year. The causative organisms were Salmonella Agona (2 cases), Salmonella Typhi-murium (2 cases), and Salmonella Enteritidis (1 case).
